Skills

- **Languages**: C, C++, SQL, Python, Java
- **Data & Analytics:** NumPy, Pandas, Matplotlib, Scikit-learn, Power BI (DAX, Power Query)
- **Databases:** PostgreSQL, MySQL, Query Optimization, Normalization
- **Tools:** Excel, Power BI, GitHub, AWS S3
- **Soft Skills:** Time Management, Analytical Thinking, Continuous Learning

Projects

- **End-to-End Weather Data Engineering Pipeline** | GitHub — December 2025 – February 2026
  - Built an end-to-end data pipeline to ingest weather data from **APIs** using Python.
  - Designed a cloud-based data lake storing raw datasets in **AWS S3.**
  - Implemented Medallion Architecture (**Raw** → **Silver** → **Gold**) for structured data processing.
  - Cleaned and transformed datasets using Pandas, storing optimized outputs in Parquet format.
  - Automated processing workflows to generate analytics-ready datasets for downstream analysis.

- **Mutual Fund Investment Analytics** | GitHub — November 2025 – December 2025
  - Built an interactive Power BI dashboard to analyze and compare mutual fund performance across categories.
  - Processed and transformed financial datasets using Power Query for reliable analysis.
  - Designed **DAX measures** to calculate average returns **(1Y/3Y/5Y),** fund rankings, investment metrics.
  - Conducted category-wise, cost vs return, and scheme-level analysis to evaluate performance and expense efficiency.
  - Developed a Lumpsum Investment Calculator to estimate invested amount, returns, and total portfolio value.
  - Supported data-driven investment decisions using **KPIs**, slicers, and dynamic visualizations.

Training

Diabetic Prediction System | Certificate — June 2025 – August 2025
- Programmed a predictive system to identify high-risk diabetes cases using patient medical attributes.
- Utilized data science techniques including data preprocessing, exploratory data analysis, feature engineering, and machine learning modeling.
- Structured the system for scalable integration into healthcare apps or clinical decision-support systems.
- **Attained** a prediction accuracy of **75%**, demonstrating effective risk identification for early intervention.
- Implemented the system in Python using libraries such as NumPy, Pandas, Scikit-learn, Matplotlib, and Seaborn.

Certifications

- Oracle Analytics Cloud 2025 Certified Professional | Oracle — October 2025
- A Guide to Machine Learning with Data Science | CipherSchools — July 2025
- Data Structures and Algorithms | Iamneo — December 2024

Achievements

- Completed **300+** coding challenges on multiple platforms | Link — January 2026
- Participated in a 24-hour Hackathon, collaborating with a team to build a functional prototype | Link — April 2024

Education

- **Lovely Professional University** — Punjab, India
  Bachelor of Technology - Computer Science and Engineering; **CGPA: 8.31** — August 2023 – Present
- **Narayana Junior College** — Hyderabad, India
  Intermediate (PCM); **Percentage: 96%** — April 2021 – March 2023
- **Dr.KKR's Gowtham School** — Hyderabad, India
  Matriculation; **Percentage: 78.8%** — June 2020 – March 2021
